

BMg

Small in its dimensions, but not in its performance

 **FIMAP®**

BMg

The evolution of #thisisfimap in its smallest form

The small dimensions are balanced by the carefully studied spaces, which ensure exceptional comfort during work. Its design facilitates every movement, while intelligent technology makes using the functions so user-friendly that it seems natural.

It is the product of an extraordinary study that has enabled the same features and options present on larger models to be integrated in such a small model, creating a scrubbing machine that is a little powerhouse.

It has a design that redefines space

The dimensions are compact like those of a walk-behind scrubbing machine, and yet the seat space is surprisingly comfortable, adapting to the operator and guaranteeing visibility and safety during any maneuver and even in tight spaces.

The polyethylene structure leaves no part exposed and protects all the components inside.

The low center of gravity ensures stability and safety during transfer, in bends and when going over ramps.

The squeegee and the support are made from aluminum, a material that increases reliability over time and offers resistance to impacts, making the machine suitable for use in any environment.

INTEGRATED VIDEO TUTORIALS

With BMg you can save the time dedicated to training: when the operator needs instructions, he or she can watch the tutorials directly on the display of the machine.

ACCESSORIES ALWAYS IN ORDER

The optional accessories are always within reach, stored in special compartments designed to not interfere with the design of the machine and to respect its dimensions.

ECO MODE

BMg can be used at any time, even in sensitive environments, with the Eco Mode function that enables the machine to work quietly without causing disturbance.

YELLOW COLOR-CODED PARTS

At the end of the cleaning operation, the yellow color reminds the operator of the parts to be cleaned immediately, to maintain constant performance over time.

SPRAY GUN

It facilitates maintenance at the end of the operation, and is useful for rinsing the tanks when there is no faucet nearby.

The machine has everything that could be of use during cleaning operations

LATERAL PADDLES

The controls on the sides of the steering wheel help the operator to maintain concentration on the working area, without danger of distractions.

The left lever manages the pressure on the brushes, while the one on the right activates the reverse function, which can be easily monitored from the display.

The low footboard makes it easy to climb on and off from both sides and enhances the feeling of comfort when driving without any effort.

Pure power to your commands

POWER MODE

With any active working program, the Power Mode function enables the scrubbing power to be increased for a short time interval, and when this has passed, the machine returns to the previous configuration. This is useful when during the normal cleaning routine, the machine comes across small areas of dirt that need a more intense scrubbing action.

REAR VIEW CAMERA

In addition to monitoring reverse maneuvers, the operator can activate the camera at any time, to monitor cleaning performance without turning around.

VACUUM WAND

Equipped with a powerful 3-stage vacuum motor, the wand enables the collection of dirt deposited in areas difficult to be reached with the machine. In cases of stubborn dirt, it can be dampened with the spray gun.

FLR-FIMAP LONG RANGE
Increases productivity by up to 70%

REDUCES DOWNTIMES

The 4 km/h working speed guarantees fast cleaning operations, while when in transfer, the machine saves time because it moves at over 5 km/h, and it is not necessary to get off when changing rooms, going through doors or getting into an elevator.

DRIES EVEN IN NARROW BENDS

The V-shaped side splash guards keep the water inside the brush area and in line with the path of the squeegee, which can then collect it completely. This enables excellent drying quality to be achieved, without leaving traces of water and with no need to pass over an area twice, even when the turning circle is limited.

All the help possible for safe operations

Safety is paramount

The BMg is equipped with a host of safety systems and features to keep the operator in complete control at all times, working with total peace of mind

ACTIVE TECHNOLOGIES to prevent accidents

Increases the safety of reverse maneuvers

REAR VIEW
CAMERA

Enhances visibility in dim light

TOUCH SCREEN
DISPLAY

The steering wheel controls offer the operator even greater control when cleaning, and also improve safety by eliminating distractions and letting the operator keep his or her eyes on the zone ahead of the machine

STEERING
WHEEL
CONTROLS

Control device letting the operator set the required speed

CRUISE
CONTROL

The anti-collision system detects obstacles when reversing

ANTI-COLLISION
SYSTEM

Maintains a constant speed when driving downhill, and prevents sudden increases in speed caused by gravity

DESCENT
CONTROL

Automatically reduces speed when steering without the operator using the brake

ESC -
ELECTRONIC
STABILITY
CONTROL

STOP&GO

The traction control system, which brakes and holds the machine when the accelerator pedal is released, provides assistance for both uphill and downhill gradients

ELECTROBRAKE

It is automatically operated when the machine stops. It works as a safety parking brake

LED
HEADLIGHTS

Front and rear LED headlights maximize work safety in all conditions

FRONT HEADLIGHTS
Position lights - Driving lights

REAR HEADLIGHTS
Position lights - Reverse lights

VIDEO
TUTORIALS

Any questions? BMg has all the answers: the video tutorials help the operator in every phase of the job

PASSIVE SYSTEMS to help the operator in case of emergency

SOS BMg

SOS DEVICE

Reduces time to service in case of emergency. The red button sends an SMS alert to receive prompt help, reducing downtimes

EMERGENCY
STOP

By pressing a single button the machine stops immediately

TUTORIALS

It is so user-friendly that it is a pleasure to operate

With the iD – intelligent Drive system, the operator interacts with the machine in a completely new way.

The management through the display enables a more precise use of the functions, as the graphic provides the information in a clear and simple manner.

This also improves the professionalism and quality of the cleaning operation.

FIMAP FLEET MANAGEMENT

Developing new technology to improve efficiency is one of the core missions of Fimap.

An example of this is FFM, the Fimap Fleet Management system which collects the data sent by the machines and transforms it into valuable information accessible to you easily in real time, 24/7, from your smartphone, through the app My.Machine.

Being constantly connected to your machines will help you operate them even more efficiently and effectively.

My.Machine lets you know where the machines are, if the operation is being carried out according to plans and at the scheduled time.

The machine's health status is constantly monitored. In the very unlikely event of a breakdown, you'll receive an alert notification directly on your smartphone, allowing you to take action promptly and immediately call the technical support.

You can check the battery conditions and the quality of the charges in order to optimize battery endurance and life cycle.

Keep tabs on your machines remotely when you want and from wherever you want!

GEOLOCALISATION

You know where
your machines are

USAGE INFORMATION

You know how your
machines are used

HEALTH STATUS

You know the health
status of machines
and batteries

ENVIRONMENTAL IMPACT

You can check
the machine
consumption
per intervention

BMg reduces the environmental impact of cleaning operations

Fimap has developed a series of solutions that act on the consumption of water, detergent and energy, to get the most out of the resources used and avoid waste. These technologies increase the efficiency of operations, respect the environment and reduce the cost of cleaning per sq.m.

The Eco Mode function helps prevent water, detergent and energy consumption by using only the quantities you need and nothing more

START&STOP

When the machine is idle, the brush motor, the vacuum motor, the traction and the water flow will turn off automatically, reducing costs and emissions. All the functions are reactivated automatically as soon as the operator touches the accelerator again

WATER

FLR-FIMAP LONG RANGE

Reduces water and detergent consumption per cleaning operation by up to 66%*. This is a system which recycles detergent solution to increase autonomy: to scrub more sq.m. while using less resources

FSS-FIMAP SOLUTION SAVER

Water and detergent quantities are separately dosed, reducing consumption by up to 50%

FWF-FIMAP WATER FLOW

Ensures uniform cleaning results across the entire working width on the first pass, optimizing detergent solution consumption

ENERGY

FES-FIMAP ENERGY SAVER

Reduces energy consumption by up to 35%

LED TECHNOLOGY

Up to 80% lower energy consumption than conventional headlights.
The LED headlights consume much less energy than conventional headlights, offer a longer lifespan and illuminate with a brilliant white light similar to natural daylight

*Saving calculated on a triple recycling cycle

Every sector has its own requirements,
BMg can satisfy them all!

BMg DISC

The brush head with disc brushes is the most versatile option, as this can adapt to all types of hard floors, both smooth and irregular, in any environment. The force of the two brushes easily removes even stubborn dirt.

BMg ORBITAL

With the orbital movement, every point of the pad is in constant contact with the floor, ensuring that the cleaning result is always uniform across the entire surface, with reduced energy consumption.

The pad action traps the solution and stops it running off at the sides, thereby reducing water consumption.

BMg

With flexible equipment options, you can configure it in the most convenient and beneficial way for you

FLR-FIMAP LONG RANGE

ACCESSORIES

Different types of PPL disc brushes are available, with thickness varying from 0.3 to 0.9. These offer the perfect solution for dealing with any type of dirt on any floor

Abrasive brushes:
Ideal for heavy duty cleaning on industrial surfaces

Pads
BLACK
Superior abrasiveness for rapid and thorough heavy duty cleaning
GREEN
Ideal for removing dirt from more delicate floors (rubber or linoleum)
RED
Ideal for scrubbing delicate or treated floors, and achieving an instant shine

Rear squeegee rubber blades
33 SHORE (PARA)
For maintenance cleaning of smooth floors
40 SHORE (PARA)
For stubborn dirt on floors with joints
POLYURETHANE
For heavy duty cleaning on industrial floors, even with wide gaps

FIMAP LIFE

Your best investment in cleaning

The service package that gives you more of what you need for less than you think!
We want you to deal only with your work, leave everything else to Fimap Life!

FIMAP INTELLIGENCE

Using powerful software, unique of its kind, and on-site advice, Fimap supports you in choosing the ideal model and its optimum configuration, according to the type of environment to be cleaned and your requirements.

FIMAP FINANCE

Fimap offers various financial solutions that can be adapted perfectly to your business.

FIMAP MAINTENANCE

With Fimap Maintenance you will not have to worry about maintenance of the product: your Fimap machines will always be as new and ready for use. Choose from the three Service Packs offered - Light, Smart or Full - to suit the needs of your job.

FIMAP FLEET MANAGEMENT

An online software collects the data sent by the machines and transforms it into valuable information that will help you dramatically improve the quality of the service offered. In this way you can optimize the use of your fleet taking into account the actual availability and eliminate wasted time.

FIMAP NETWORK

Fimap is always there for you: our global network of certified dealers guarantees a rapid response support service, wherever you are.

FIMAP ACADEMY

In a market that is becoming more and more competitive, Fimap offers a new support service for cleaning contractors, a growth opportunity for the professionals of today and tomorrow. This dedicated training program addresses various subjects that are relevant for the daily requirements of customers.
