

GAISER 18000

Cleaning and sanitizing work can be incredibly enhanced with the use of steam, which - in addition - guarantees considerable savings on the consumption of water and detergents.

GAISER 18000 is a three-phase steam generator ideal for industrial use, with a robust stainless-steel body.

The boilers have a capacity of 4,2 liters each, which develop 10 bar of pressure thanks to three heating elements of 18000 W in total. Note that the three heating elements can be easily removed, to simplify their eventual servicing (Easy-Service system). Additionally, the boilers are equipped with the exclusive Non-Stop System technology, which facilitates the continuous supply of water within the same.

Thanks to our exclusive Dose-Master technology (from 1 to 32 levels), the electronic management of the "steam / detergent" mixture allows you to mix the ideal quantity of solution with steam, thus avoiding any waste. In addition, the exclusive Hydro-Jet system enhances cleaning by generating flows of wet steam, thus facilitate the rinsing of the surfaces being treated.

Gaiser 18000 is a very safe product: our Intelli-Boiler system automatically turns off the machine in case of emergency.

Gaiser 18000 is the most powerful model of the line. It is a machine with a sturdy steel body, capable of delivering a continuous flow of steam, which makes it ideal for the most demanding applications. Furthermore, this model can be equipped with the exclusive Hydro-Power technology (optional), which enables the connection of the Gaiser 18000 to the water mains, for long-term work.

TECHNICAL FEATURES

Model	GAISER 18000	Temperature Max	185 °C
Power Supply	400V	Steam Production	480 g/min
Max Power	18000 W	Refill Tank	15 L
Boiler Power	18000 W	Detergent Tank	5 L
Boiler Capacity	4,2 L x 2	Vacuum Power	-
Pressure	10 BAR	Body	STAINLESS STEEL
