

GAISER 9000

Cleaning and sanitizing work can be incredibly enhanced with the use of steam, which - in addition - guarantees considerable savings on the consumption of water and detergents.

GAISER 9000 is a three-phase steam generator ideal for industrial use, with a robust stainless-steel body.

The boiler has a capacity of 4,2 liters, which develops 10 bar of pressure thanks to three heating elements of 9000 W in total. Note that the three heating elements can be easily removed, to simplify their eventual servicing (Easy-Service system). Additionally, the boiler is equipped with the exclusive Non-Stop System technology, which facilitates the continuous supply of water within the same.

Thanks to our exclusive Dose-Master technology (from 1 to 32 levels), the electronic management of the "steam / detergent" mixture allows you to mix the ideal quantity of solution with steam, thus avoiding any waste. In addition, the exclusive Hydro-Jet system enhances cleaning by generating flows of wet steam, thus facilitate the rinsing of the surfaces being treated.

Our exclusive Flow-Master technology makes it very easy to manage steam and allows to decrease or increase its flow according to real needs. Gaiser 9000, moreover, is a very safe product: our Intelli-Boiler system automatically turns off the machine in case of emergency.

Thanks to its power and extremely robust structure, Gaiser 9000 is the ideal machine for the most demanding industrial applications.

Furthermore, this model can be equipped with the exclusive Hydro-Power technology (optional), which enables the connection of the Gaiser 9000 to the water mains, for long-term work.

TECHNICAL FEATURES

Model	GAISER 9000	Temperature Max	185 °C
Power Supply	400V	Steam Production	288 g/min
Max Power	9000 W	Refill Tank	15 L
Boiler Power	9000 W	Detergent Tank	5 L
Boiler Capacity	4,2 L	Vacuum Power	-
Pressure	10 BAR	Body	STAINLESS STEEL
